

Administration

ictime distinguishes three main areas of configuration:

- General configuration of **ictime** itself, i.e. availability and behaviour of some **ictime** feature (see [General Configuration](#))
 - Managing data that will be available when configuring projects, like Activity Types, Rounding Rules or Global Teams & Price Lists as well as configuration of permissions. This is the subject of this chapter.
 - Configure projects which includes options like currency, accounting data, teams & price lists, approval, project-specific activity types etc. (see [Project Configuration](#)).
-
